

ACHILLES

Inflatable Boats

2014

THE BEST NAME YOU CAN PUT ON AN INFLATABLE BOAT

Introducing the New LSI "E" Series!

- New CSM Fabric Floor provides even greater stiffness
- New Lateral Seam Design for a sleeker, modern look
- New webbed handles and helmsman grip

See page 7.

LSI-290E

Introducing the New SPD "E" Series!

- New Aluminum Floorboards for less maintenance and better durability
- New Lateral Seam Design for a sleeker, modern look
- New webbed handles and helmsman grip

See page 9.

SPD-290E

At Achilles, the process of providing boaters with the highest quality inflatable boats in the world begins with manufacturing our own industry-leading CSM fabric and ends with providing Achilles owners unsurpassed customer service.

The quality of Achilles CSM Fabric has such a great reputation in the inflatable industry that many other inflatable boat manufacturers around the world buy it from us to use on their boats. But we do not stop at producing our own tough, airtight fabric that is virtually impervious to the elements, oil, gasoline and abrasions. We take the extra time and expense to build in the finest safety and performance features other manufacturers do not, such as our exclusive 4-layer overlapped seam construction. We meticulously design all our boats to deliver unsurpassed performance while outfitting each one with a comprehensive array of quality standard features you will not find on other inflatables. When you compare the design and features of any Achilles boat with any competing model, you will understand why we own a well-deserved reputation for quality forged over the last 40 years.

UNSURPASSED SEAM CONSTRUCTION

Our seams are overlapped a full inch and reinforced with seam tape both inside and out. No one else takes so many steps to ensure seams will last.

With Achilles, quality doesn't stop with the sale. We provide both customers and dealers alike with comprehensive and responsive post-sales support in every aspect of Achilles ownership. Our customer-friendly web site not only offers comprehensive information on our current models, but also on all Achilles boats produced since 1978.

When you choose an Achilles, you will come away with a high quality inflatable boat and an ongoing relationship with a company committed to its customers.

ACHILLES WORK & RESCUE BOATS

Achilles produces heavy-duty workboats and rapid deployment rescue boats. Call or email us for our Commercial Boat catalog.

ACHILLES RIVERBOATS

Achilles produces a complete line of CSM riverboats and kayaks. Call or email us for our riverboat brochure.

NON-CORROSIVE CHECK VALVES

All Achilles valves are non-corrosive with no moving parts that might break. They are engineered for easy "one-way" inflation and instant deflation.

A SMOOTH, SIMPLE OAR SYSTEM

We invented the fold-down, locking oar system that makes rowing a breeze while keeping oars secured and out of the way when not in use.

FULL FIVE-YEAR WARRANTY ON FABRIC AND SEAMS

We back our claim to having superior fabric and construction with a strong warranty commitment.

Achilles boats are certified by the National Marine Manufacturers Association as adhering to federal regulations and rigid industry standards established by the U.S. Coast Guard and the American Boat & Yacht Council. Achilles boats must pass rigorous annual inspections from independent third party inspectors to maintain this prestigious certification that guarantees our boats meet the highest safety and production standards. Achilles boats are also manufactured to meet or exceed ISO6185 standards.

LT DINGHY SERIES

A lot of quality in a compact package. That describes our LT Series dinghies.

These two and four-person boats go from their handy carry bags to fully equipped dinghies in just minutes. Compact enough to be stored virtually anywhere, they are safe, durable and dependable dinghies capable of carrying substantial loads. They come ready to work with fold-down oar system, wood seat, fold-up floor and motor mount. Even though they are our most economical boats, they are made with the same durable Achilles CSM fabric and four-layer seam construction, and backed by the same five-year warranty as our large sport boats.

LT-4

LT-2

The LT-4 has a heavy-duty removable motor mount that fits quickly and securely into molded rubber mounting attachments.

LS-RU ROLLUP TENDER SERIES

Value packed, roll-up option for boaters who need the space-saving convenience of a lightweight, easy-to-stow tender.

LS4-RU

LS4-RU

Both our LS-RU rollup tenders can be stowed in a space just 10" high. With a roll-up wood/Achilles CSM fabric floor and solid transom, they can be inflated and ready to go in minutes. When they are, they deliver surprisingly large load and person capacities. Easy to carry, easy to set up, easy to store – the LS-RU.

LEX SPORT TENDER SERIES

These timeless tenders still offer boaters the classic inflatable look and functionality that has made them so popular.

LEX-88

LEX boats represent the culmination of many subtle refinements over the years that have kept them technologically current while maintaining their traditional appearance. A sleek bow design and ample interior space come together in this classic tender. A teardrop rub strake deflects spray and improves protection from the inevitable collisions with docks and boat hulls.

Additional features include an adjustable range wood seat and a full sectional wood floor. They all add up to a solid, reliable tender that combines practicality and performance in an economical package.

LSR SPORT TENDER SERIES

The only inflatable tenders that truly combine the convenience of a roll-up floor with the rigidity and strength of floorboards.

LSR-290

LSR-290

Achilles has developed a unique aluminum floor that makes it a snap to quickly inflate or roll up these tenders. This unique floor design with an innovative hinge system makes this roll up floor stronger and firmer than others. This is combined with an inflatable keel and V-shaped fiberglass-encased transom to enhance performance. Large 17" tubes allow the LSR tenders to carry heavy loads. Add in the improved buoyancy, extra load capacity and smoother planing provided by the Performax end cone design, and you have a roll-up tender that is tough to beat.

Performax end cones perform better with today's heavier 4-stroke motors.

LSI SPORT TENDER SERIES

The first inflatable tenders made with Achilles high pressure CSM-reinforced AirFirm™ floors have been redesigned for 2014 to look and perform better than ever!

The world's best high-pressure AirFirm™ floor tenders continue to lead the industry in innovation, styling and performance. For 2014 we have modified the tube design by incorporating a lateral closing seam for a sleeker, cleaner, more modern look. We have also modified the high pressure floors using an enhanced polyester core CSM fabric resulting in a stiffer floor.

The result is not only a more stylish tender, but also one that outperforms other air floor models by a wide margin. The combination of Performax tubes engineered to work efficiently with today's heavier 4-stroke motors, air keel, and a stiffer air floor result in a smoother handling and better performing boat. And the longer waterline resulting from Performax tubes allows these boats to plane even quicker and to stay on a plane at slower speeds.

Our Achilles high pressure, CSM drop-stitch AirFirm™ floors continue to provide the industry's toughest air decks. When you consider the abuse floors take from scrapes, the sun, salt water, oil and gasoline, it makes sense to have the toughest material available to protect them. And besides being durable, their unique construction consisting of thousands of polyester threads makes these floors remarkably rigid and incredibly lightweight as well.

Achilles high-pressure CSM drop-stitch AirFirm™ floors provide superior rigidity.

Performax end cones perform better with today's heavier 4-stroke motors.

LSI STANDARD FEATURES INCLUDE: Achilles CSM-reinforced fabric; four-layer seam construction; removable Achilles CSM high-pressure drop stitch air floor; fold-down locking oar system with two-piece breakdown aluminum oars and oar holders; full length teardrop rubbing strake; bow carry handle and towing D-rings; interior bow lifting D-ring (except LSI-230E); removable wood rowing seat; high volume/high pressure foot pump with pressure gauge; protective pad for gas tank; fiberglass encased v-shaped transom; air keel (except LSI-230E which has a painted wood transom and no keel); extra seat attachment patches on LSI-290E, LSI-310E, LSI-330E and LSI-360E; carry bag; and maintenance kit. LSI-230E, LSI-260E, LSI-290E, and LSI-310E have stern mounted strap lift and carry handles. The LSI-330E and LSI-360E have rear molded lift and carry handles. All models have a fabric helmsman grip except the LSI-360 which has a molded rubber helmsman grip.

Redesigned for 2014!

Other features such as an inflatable keel that enhances performance, a durable fiberglass-encased transom**, and large tube diameters for better load capacity add to the overall quality and value of LSI boats. No other manufacturer offers more quality or more choices in an air floor inflatable boat.

LSI-290E

LSI-290E

Extra Seat Attachment Patches are Standard on LSI-290E, 310E, 330E and 360E.

LSI-260E

LSI-260E

**LSI-230 has no air keel and a painted wood transom.

SPD SPORT TENDER SERIES

Redesigned for 2014!

These solid sport tenders have been a staple in the Achilles lineup for over 30 years and now they are even better!

SPD-290E

D-290E

We have never stopped making our SPD boats better which is why they have remained popular with boaters for so long. That commitment to innovation and improvement continues in 2014 with tube and floor design enhancements. New lateral seam tube construction gives these classic inflatables a more modern, stylish design. Rope lifelines have been replaced with webbed handles and helmsman grip for a cleaner appearance. The three rear floorboards that bear the brunt of abuse are now aluminum to decrease maintenance and increase durability.

The classic features that make these boats so desirable remain such as large diameter tubes for greater load capacity and better performance, a removable wood rowing seat and an air keel/ floor joint system that deliver a more rigid floor.

Performax end cones perform better with today's heavier 4-stroke motors.

HB-FX RIGID HULL SERIES

An innovative folding transom makes these lightweight RIB's the easiest to transport, carry, and launch

HB-300FX

HB-270FX

The Achilles HB-FX boats feature a unique folding transom, lightweight design, and full-length padded carry bag that combine to make these rigid hull models the easiest to transport and launch. Despite their lighter weight, both these popular FX models offer large load capacities and the ability to carry four people. The Achilles HB-FX series offers boaters the most convenient RIB's available.

Easy to fold and store

Deluxe padded carry bag is standard.

HB-FX STANDARD FEATURES INCLUDE: Pearl Gray Achilles CSM reinforced fabric; four-layer seam construction; modified "V" fiberglass hull; folding fiberglass transom; deluxe padded full length carry bag; full length teardrop rubbing strake; D-rings for towing bridle; stainless steel bow eye; inside bow davit lifting eye; bow and stern carry handles; grab handles; fold-down locking oar system with two-piece breakdown aluminum oars and oar holders; interior oar straps (HB-300FX only); gas tank tie down hardware; protective transom motor clamp plate; removable wood rowing seat; extra seat attachment patches (HB-300FX only); foot pump; and maintenance kit.

HB-LX RIGID HULL SERIES

Our lightweight series rigid hull line is still packed with high performance features.

HB-280LX

The Achilles HB-LX boats provide the critically acclaimed performance of the Achilles DX deep "V" fiberglass hull design in a lighter RIB. They also have the same tube design as the DX series, yet a modification of the deck design and removing the bow locker results in a RIB that is on average 20% lighter than the same size DX model.

This means they can perform well with smaller engines and can be carried or transported more easily. Despite their lighter weight and lower cost

compared to the HB-DX series, they are still loaded with all the high quality standard features for which Achilles is known.

HB-DX RIGID HULL SERIES

These deluxe hard bottom inflatables offer boaters the best combination of style, performance, and functionality.

Sleek, Euro-style tubes give them a stylish edge over other RIB's. A deep "V" fiberglass hull delivers superior performance while a built-in bow locker provides both a seat and a place for gear. If you want to take a step above the norm in a hard-bottomed tender, step up to an Achilles HB-DX RIB. Like every Achilles boat they are made with our own Achilles CSM fabric so they can handle the burning sun of the tropics or cold northern waters without fading or deteriorating. Choose a rigid-hulled inflatable that gives you a little extra. Choose an Achilles HB-DX.

HB-280DX

A deep "V" fiberglass hull takes Achilles RIBs to an even higher level of performance.

FRB SPORT UTILITY SERIES

A versatile utility boat that's ready to go in minutes.

FRB-124

Designed originally as quick response boats for fire departments and rescue units, these unique aluminum roll up floors with an innovative hinge system and non-skid panels can perform a variety of functions. They are easy to store or carry and can be set up in minutes. The main air chambers are equipped with over pressure relief valves. They can be inflated either by compressed air bottles or the standard equipment foot pump.

FRB-124

In addition to their Achilles CSM fabric and four-layer seam construction, other special features like abrasion wear patches and removable storage bags make them practical alternatives for tackling a range of jobs on the water.

FRB STANDARD FEATURES INCLUDE: Achilles CSM reinforced fabric; four-layer seam construction; deep "V" inflatable keel; aluminum roll-up floor with non-skid panels, fiberglass encased v-shaped transom with protective motor clamp plate; two (2) paddles with interior tie downs; two removable storage bags; full length splash guard with life lines; abrasion patches; five (5) interior tie-down D-rings; full-length teardrop rubbing strake; foot pump and maintenance kit. The FRB-104 has two (2) over pressure relief valves, four lift and carry handles, interior bow lifting D-ring and bailer valve. The FRB-124 has four (4) over pressure relief valves, six (6) lift and carry handles, two (2) bailer valves and heavy duty bailer sleeve.

SGX SPORT UTILITY SERIES

These versatile aluminum and wood-floored boats are the perfect solution for a range of uses.

SGX-122

They are rugged and roomy so they can be put to the test as dive boats, heavy duty tenders or utility boats. Their sporty nature also makes them great runabouts that really perform thanks to their deep "V" inflatable keel and large tube diameters. A range of quality features include a v-shaped fiberglass-encased transom and removable, dual position wood seat. Their Achilles CSM fabric and four-layer seam construction make these sport boats extremely tough...and tough to beat.

SGX STANDARD FEATURES INCLUDE: Achilles CSM reinforced fabric; four-layer seam construction; aluminum and wood floorboards with aluminum stringer system; v-shaped fiberglass encased transom; full-length teardrop rubbing strake; deep "V" inflatable keel; towing bridle D-rings; fold-down locking oar system with two-piece breakdown aluminum oars and oar holders; bow handle; four (4) lift and carry handles; helmsman grip; two (2) bailer valves; gas tank tie downs; lifelines; removable wood seat; extra seat attachment patches; high-volume foot pump; two carry bags; and maintenance kit.

SGX-132

The aluminum floor and v-shaped fiberglass-encased transom enhance durability and performance, and decrease maintenance.

SG SPORT UTILITY SERIES

These “top-of-the-line” models continue to set the standard for inflatable sport-boats.

SG-140

Built for high performance with deep “V” trigon air keels, Achilles SG boats offer a roomy, square bow configuration which provides room for extra gear, and an aluminum and fiberglass floor system* which delivers superior rigidity and durability. Achilles SG Sportboats bring performance and practicality together for better diving, fishing, or all-around sport-boating pleasure. They are also perennial rescue and emergency boat favorites of fire departments, first responders and others around the world.

SG STANDARD FEATURES INCLUDE: Achilles CSM reinforced fabric; four-layer seam construction; trigon air keel; aluminum and fiberglass* floorboards with aluminum stringer system; fiberglass encased transom with protective motor clamp plate; fuel tank tie-downs; two (2) bailer valves; full-length teardrop rubbing strake; fold-down locking oar system with two-piece breakdown aluminum oars and oar holders (except SG-156); bow carry handle; lift and carry handles; towing bridle D-rings; helmsman grip; full-length splash guard with life lines; removable wood seat (except SG-156); extra seat attachment patches; large, high-volume foot pump; double carry bag system; and maintenance kit.

*SG-124 floorboards are aluminum and wood.

SU SPORT UTILITY SERIES

SU Boats are built tough to work hard for rugged private and commercial use.

SEAT, CONSOLE AND ARCH SHOWN ARE CUSTOM DEALER OPTIONS*

SU-16

They are made with an additional heavy-duty layer of 840-denier nylon Achilles CSM fabric in a two-ply technique which results in a fabric even stronger than a single base fabric of equal thickness. A number of commercial grade features such as recessed valves and a full-length, protective wear patch combine to make these boats the right choice for the toughest marine uses.
